## Who We Are ?

***Krafty Lines Landscape*** is a creative landscape architecture and design studio passionate about shaping meaningful outdoor spaces. We believe in the power of landscapes to connect people with nature while enhancing the overall experience of built environments.

## What we do ?

We design and transform outdoor spaces into functional, aesthetic, and sustainable environments. Our work includes landscape master planning, planting design, hardscape detailing, water features, and lighting—tailored to blend naturally with the architectural vision.

## Why We're Different ?

At Krafty Lines, we don't treat landscape as a separate layer—we design it as an extension of the architecture. Every space we craft is rooted in context, seamlessly merging nature with structure to create one unified and purposeful design that's both elegant and practical.

## Who are our Clients?

We collaborate with a diverse range of clients, including architects, developers, institutions, homeowners, and corporate spaces. Whether it's a private garden, a large residential development, or a public open space, we deliver personalized and thoughtful landscape solutions for every scale and vision.

# Our Services

## Landscape Master Planning

We develop holistic landscape strategies that align with the site's architecture, topography, and user needs, ensuring long-term functionality and beauty.

## Planting Design

Tailored planting schemes using climate-appropriate and low-maintenance species to bring life, texture, and color to your landscape.

## Hardscape Design

Design of pathways, seating areas, decks, pavements, and built landscape elements that enhance usability and character.

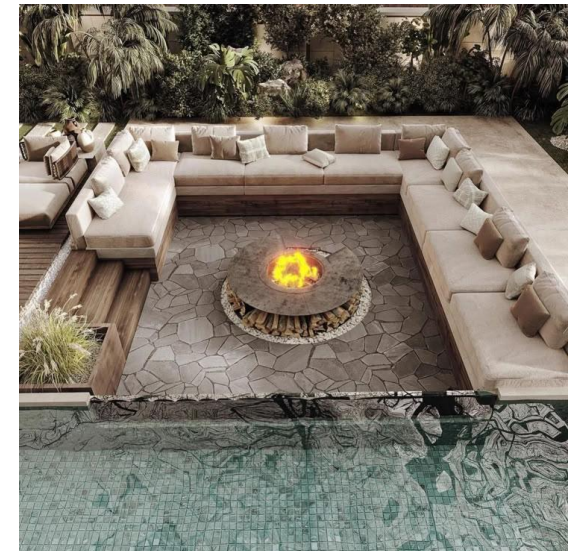

## Water Features & Lighting

Design of fountains, ponds, cascades, and ambient lighting that elevate the sensory and visual appeal of outdoor spaces.

## Garden & Terrace Design

We create private, serene green spaces—be it a residential garden, courtyard, or rooftop—personalized for leisure, reflection, or gathering.

# Our Services

## Sustainable Landscaping

Eco-conscious designs that prioritize native plants, rainwater harvesting, efficient irrigation, and long-term ecological balance.

## Visualization & 3D Rendering

High-quality renders, walkthroughs, and design illustrations that allow clients to preview and fine-tune the design vision.

## Project Supervision & Consultation

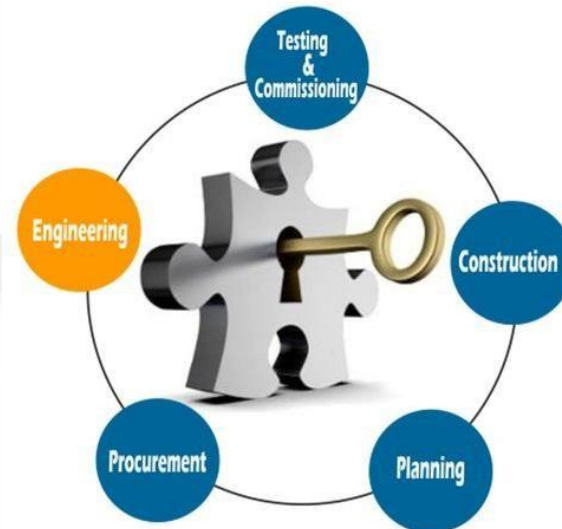

Hands-on involvement to ensure that designs are implemented faithfully, including vendor coordination, site visits, and quality checks.

## Turnkey Landscape Projects

End-to-end execution of landscape projects. From concept & design to construction & final handover. Delivered with integrity, precision, & accountability.

## Green Building Approval Support

Assistance in preparing landscape-related documentation and compliance reports required for GRIHA, IGBC, or LEED green building certifications.

# Project 1: CSK Skyscape

## CSK Skyscape by CSK Ventures – Hyderabad

A landscape design for a premium 10-storey residential tower, where space was limited but expectations were high. The client sought a fresh and distinctive outdoor environment despite the compact site. Our approach focused on simplicity and elegance—using flowing, curved lines in the layout to create a sense of movement and softness. This thoughtful use of form transformed tight areas into dynamic, inviting spaces, offering both visual appeal and practical functionality for residents.

# Project 1: CSK Skyscape

# Project 2: Public play park

## Public Play Park – Government Proposal

A conceptual design proposal developed for a public recreational park under the government's urban revitalization initiative. This project focuses on creating an inclusive, nature-connected play space that encourages interaction, creativity, and wellness for all age groups. The design integrates natural materials, themed play zones, walking trails, shaded seating, and native plantation to offer a sustainable and community-centric outdoor experience.

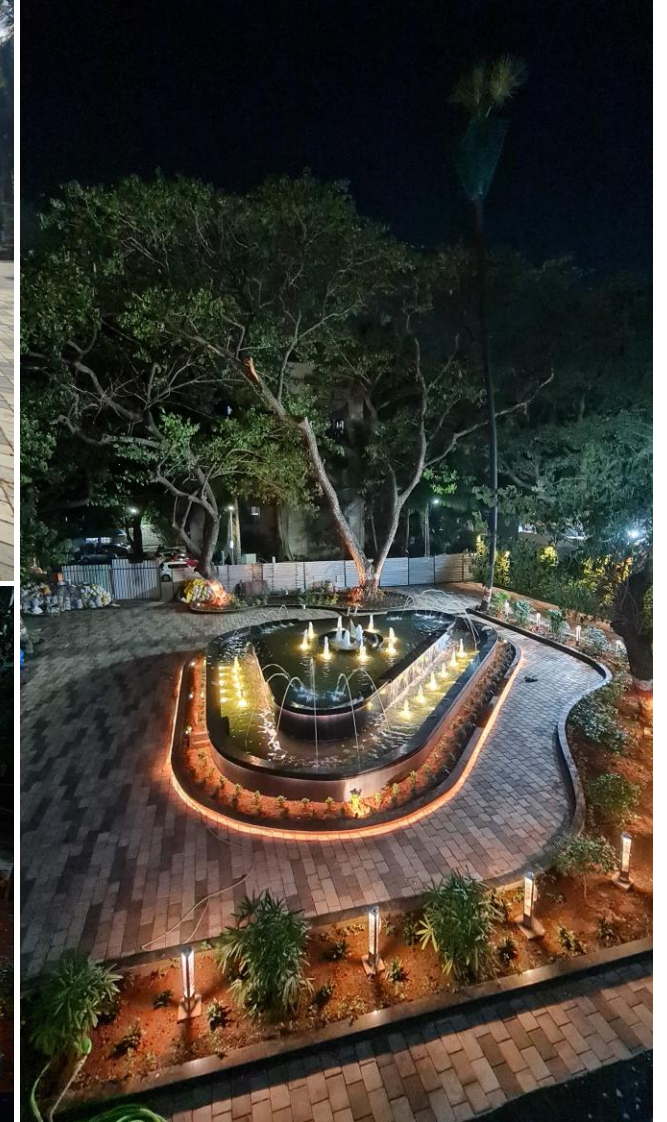

# Project 2: Public play park

# Project 3: Fountain project

## Clubhouse Entrance Fountain Plaza – HP Petroleum [Mumbai]

This project involved designing an elegant and grand entrance plaza for a premium residential clubhouse. At the heart of the design is a bold, triangular-shaped fountain that acts as a striking focal point. We developed a custom-cut, edge-detailed fountain wall that combines contemporary aesthetics with precision craftsmanship. The minimalist surrounding landscape enhances the drama of the fountain, offering a sense of arrival and sophistication to the entire development.

# Project 3: Fountain project

# Project 5: Buddha Garden

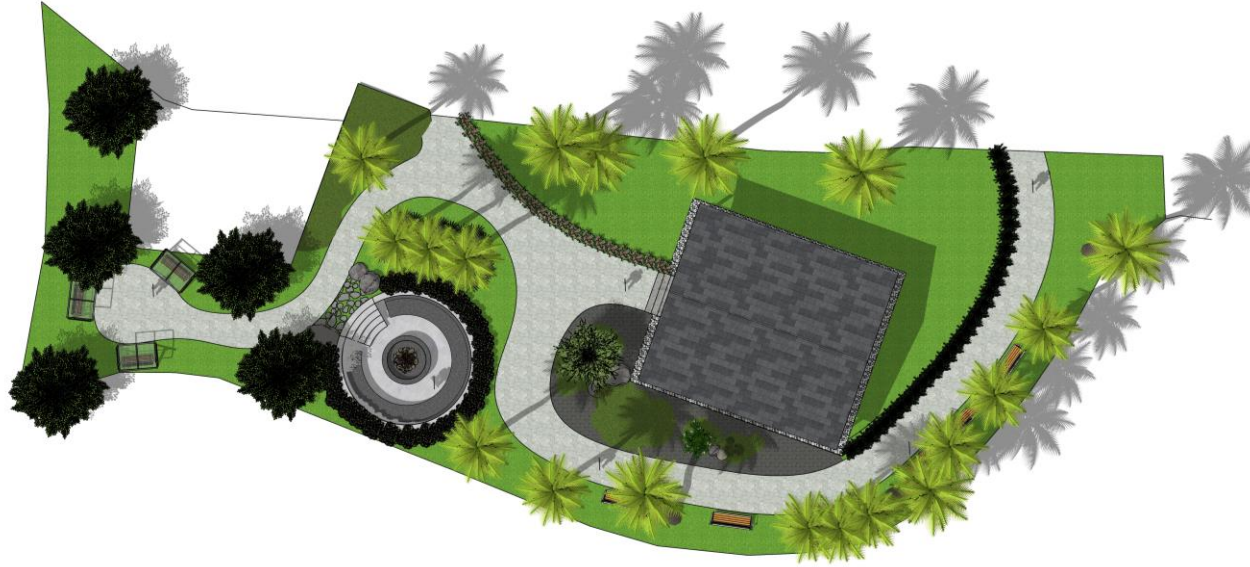

## Buddha Garden – HP Petroleum [Mumbai]

A tranquil, meditative garden designed to evoke calm & spiritual connection. Centered around a serene Buddha sculpture, the space features soft landscape contours, water elements, & subtle lighting to create a peaceful retreat. Carefully selected plantings & natural textures offer a soothing, immersive environment ideal for reflection & quiet relaxation.

# Project 5: Leisure Park

## Leisure Park Redevelopment – HP Petroleum [Mumbai]

This project reimagines a defunct aquaponics space into a vibrant leisure park designed for relaxation and social gatherings. Key features include a central gazebo, a winding pathway with colorful plantations, and a cozy bonfire area. The design brings new life to the site by blending comfort, color, and community in a nature-connected setting.

# 3D Visualization & Design

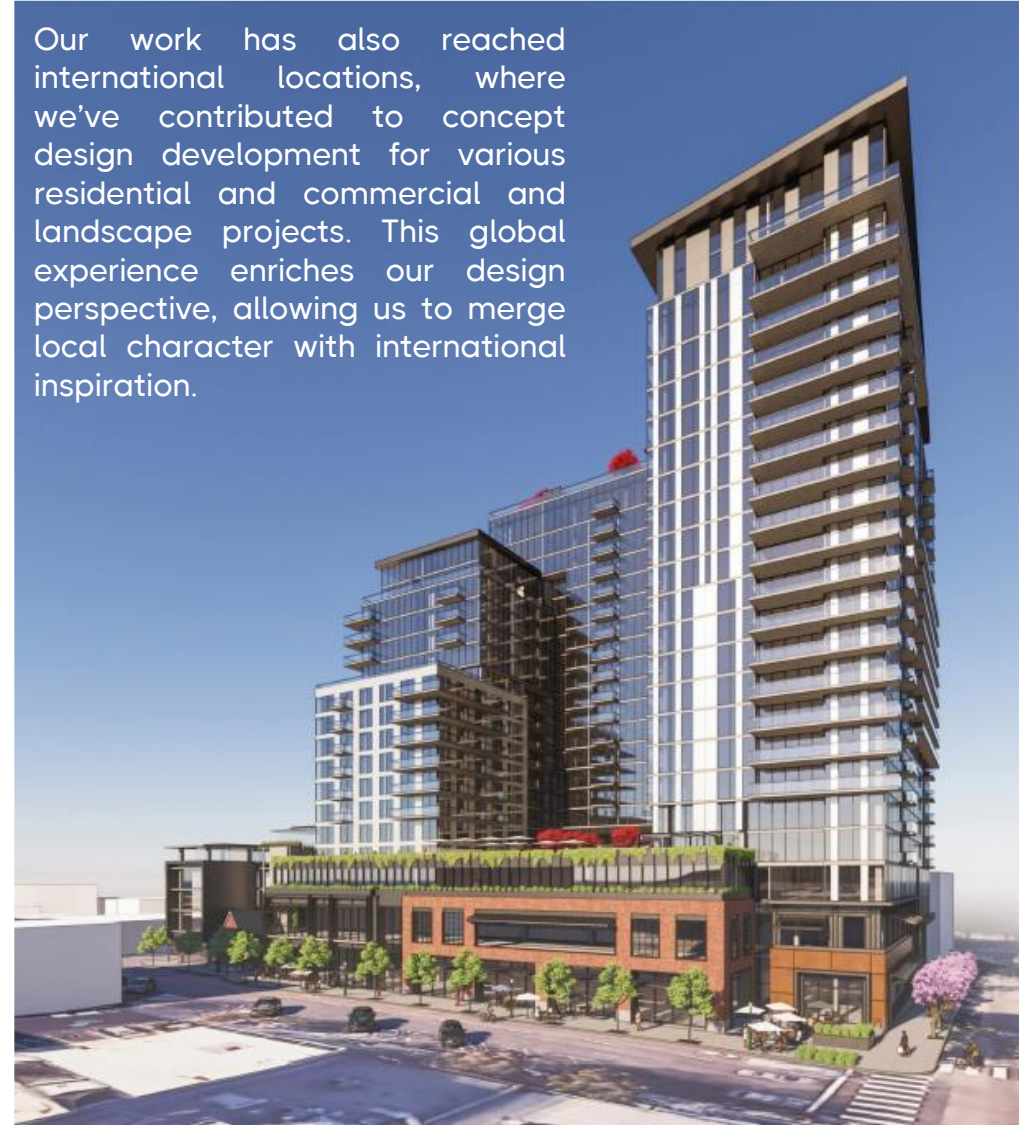

## 3D Visualization & Global Design Work

We create high-quality 3D visualizations and walkthroughs that help clients clearly understand and experience their landscape designs.

# 3D Visualization & Design

Our work has also reached international locations, where we've contributed to concept design development for various residential and commercial and landscape projects. This global experience enriches our design perspective, allowing us to merge local character with international inspiration.

# Our Core Team

**Husain Ronaque**  
*Founder & Principal Architect*

With a deep-rooted passion for landscape design, Husain leads the firm with a strong vision for design innovation, site-responsive planning, & seamless integration of landscape & architecture. He oversees the design direction, ensures quality in every project stage, & personally engages with clients to understand their aspirations.

**Yusuf Officwala**  
*Senior Landscape Architect*

With years of experience in residential and public space landscape design, Yusuf leads the design development and technical detailing of our projects. He brings expertise in planting palettes, spatial functionality, and sustainable landscape practices, ensuring every design is both beautiful and practical.

**Mustafa Fidvi**  
*Principal Operations*

With a background in project management and operations, Mustafa ensures seamless coordination between design and execution. He plays a key role in vendor management, budget control, and timelines, ensuring every project moves efficiently from concept to reality.

**S. Ahmed**  
*3D Visualiser & Lighting Expert*

Trained in advanced visualization and lighting techniques, Ahmed specializes in producing high-quality 3D renders and lighting layouts that help clients fully experience their spaces before construction begins. His expertise brings a dynamic, immersive edge to our design presentations.

**Samina K**  
*Business Development & Creative Designer*

With a background in design and marketing, She plays a key role in shaping the firm's visual identity through graphic design, marketing, and branding strategies. Samina helps Krafty Lines stand out in the industry—ensuring our work is not only well-designed but also well-presented and positioned in the market.

**At Krafty Lines, our team is the heart of every project. With diverse expertise and a shared passion for design excellence, we work collaboratively to deliver thoughtful, high-quality landscape solutions.**

# Why Choose Us?

At **Krafty Lines Landscape**, we believe great landscapes are more than just beautiful—they're thoughtful, purposeful, and seamlessly integrated with the spaces they serve. As a trusted partner, we are committed to translating your aspirations into meaningful outdoor environments.

We do this in numbers of ways:

- **Design-Led Thinking:** We approach every project with creativity, functionality, and a deep understanding of space and user needs.
- **Architecture-Integrated Landscapes:** We don't treat landscape as a backdrop—our designs blend seamlessly with architecture to form one cohesive, elegant whole.
- **Tailored Solutions:** Every project is custom-designed to suit the site, client preferences, and context—no copy-paste designs.
- **Sustainability First:** Eco-sensitive planning is at the core of our work, using native plants, water-efficient systems, and low-impact materials.
- **End-to-End Execution:** From concept to completion, we offer turnkey services that ensure quality control and design fidelity at every step.
- **Client-Centric Approach:** We collaborate closely with our clients, keeping communication transparent and designs flexible until every detail feels just right.

Choosing **Krafty Lines Landscape** means choosing someone dedicated to transforming your space into not only a visually stunning environment but also a perfect fit for your family or business.

# Our Design Process

1

## Initial Consultation

We begin by understanding your vision, lifestyle, site conditions, and specific requirements through meetings, calls, or site visits.

2

## Site Analysis & Survey

We analyze the physical and environmental characteristics of the site—topography, climate, vegetation, views, and architectural context.

3

## Concept Development

We create preliminary concepts, mood boards, and layout sketches that communicate the overall design direction and spatial experience.

4

## Design Presentation

The concept is presented with 2D drawings and 3D visuals to help you envision the space. We incorporate your feedback to refine the design.

5

## Design Refinement & Detailing

We fine-tune the approved concept into detailed plans—planting layouts, hardscape details, lighting plans, and material palettes.

# Our Design Process

6

## Cost Estimation & BOQ

A detailed Bill of Quantities (BOQ) and cost estimate is provided to help you plan budgets, materials, and timelines with confidence.

7

## Material, Furniture, Element Selection

We assist in selecting suitable landscape materials, outdoor furniture, lighting fixtures, and other key elements that match the design intent and functionality.

8

## Working Drawings & Documentation

We prepare construction-ready drawings and documentation for execution, including vendor coordination and approvals as required.

9

## Implementation & Supervision

Whether executed by your contractor or our turnkey team, we provide on-site guidance to ensure design accuracy and quality control.

10

## Final Handover & Review

We conduct a final walkthrough with you, ensuring everything meets expectations, along with basic care guidelines for long-term landscape health.
